Now do the following

[21, 22, 23, 24, 25]])

```
Get the sum of all the values in mat
```

array([[16, 17, 18, 19, 20],

In [64]: mat[3:5,:]

```
In [65]:
          mat.sum()
           325
Out[65]:
           Get the standard deviation of the values in mat
```

mat.std()

```
7.211102550927978
Out[66]:
```

Get the sum of all the columns in mat

mat.sum(axis=0) array([55, 60, 65, 70, 75])
